HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed 9/8/10 have been fully considered but they are not persuasive.
2. The applicant agreed to an examiner's amendment to place the claims in allowable form.
3. The applicant cancelled claims 29,31 and 33 to overcome the 112 rejection set forth in the previous office action.
4. Claims 3,9,12,18,21,27,29,31 and 33 are cancelled.

EXAMINER'S AMENDMENT

5. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Todd N. Snyder (Reg. NO. 41,320) on 9/29/10.

The claims are to be amended as follows:

Claims 19,20,22-26 and 32: CANCEL.

Claim 1 is to be amended to recite the following:

Art Unit: 2614

A method of automatic measurement of audio presence and level by direct processing of a data stream representing an audio signal in a processor, comprising:

- (a) extracting, in the processor, sub-band data from the data stream;
- (b) dequantizing and denormalizing, in the processor, the extracted sub-band data;
- (c) measuring, in the processor, an audio level for the dequantized and denormalized sub-band data without reconstructing the audio signal using channel characteristics;
- (d) comparing, in the processor, the measured audio level against one or more thresholds;

and

- (e) triggering, in the processor, an alarm as determined by the comparing step (d), wherein the one or more thresholds are set to generate the alarm based on: ~~(1) loss of the audio signal in the data stream or~~ (2) when an average of the audio level in the data stream is too high or too low, in order to monitor the audio presence and level within the data stream and to adjust the audio level as desired.

Claim 10 is to be amended to recite the following:

In a processor, an apparatus for automatic measurement of audio presence and level by direct processing of a data stream representing an audio signal, comprising:

- (a) means for extracting sub-band data from the data stream;
- (b) means for dequantizing and denormalizing the extracted sub-band data;
- (c) means for measuring an audio level for the dequantized and denormalized sub-band data without reconstructing the audio signal using channel characteristics;

Art Unit: 2614

(d) means for comparing the measured audio level against one or more thresholds; and
(e) means for triggering an alarm as determined by the means for comparing (d),
wherein the one or more thresholds are set to generate the alarm based on: ~~(1) loss of the audio signal in the data stream or (2)~~ when an average of the audio level in the data stream is too high or too low, in order to monitor the audio presence and level within the data stream and to adjust the audio level as desired.

Allowable Subject Matter

6. Claims 1,2,4-8,10,11,12-17,28 and 30 are allowed.

7. The following is an examiner's statement of reasons for allowance:

8. Regarding claims 1 and 10, prior art McDowell (US 6,931,370) discloses a method of automatic measurement of audio presence and level by direct processing of a data stream representing an audio signal, comprising:

(a) extracting sub-band data from the data stream (column 3, lines 24-28; column 10, lines 35-45; implicit) ;

(b) dequantizing and denormalizing the extracted sub-band data (step 126 Figure 9; column 11, lines 6-11);

c) measuring an audio level for the dequantized and denormalized sub-band data without reconstructing the audio signal using channel characteristics (step 130 Figure 9; column 11, lines 58-62; characteristic is defined as a distinguishing feature, quality or property. The examiner asserts that the sub-band data reads on channel characteristics since the sub-band data is implicitly unique to its input signal); and

Art Unit: 2614

(d) comparing the measured audio level against at least one or more thresholds (step 136 Figure 9; column 12, lines 3-8).

Prior art Friedman (US 5,337,041) discloses a means for triggering an alarm when the threshold is exceeded (column 10, line 65-column 11, line 7; specifically Friedman teaches of an alarm that is triggered when a modulated audio tone is detected as exceeding a preset threshold). Prior art Petrillo (US 6,429,779) discloses the concept of an alarm being generated based on the loss of a signal is well known in the art as taught by Petrillo (column 4, lines 16-25).

Regarding claims 1 and 10, the prior art or combination thereof fails to make obvious or disclose the invention as a whole and in particular, triggering, in the processor, an alarm as determined by the comparing step (d), wherein the one or more thresholds are set to generate the alarm based on when an average of the audio level in the data stream is too high or too low, in order to monitor the audio presence and level within the data stream and to adjust the audio level as desired.

Claims 2,4-8,11,13-17,28 and 30 are allowed due to dependency on claims 1 and 10.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
